STRONG HARDWARE

CT5 series videoscope is module designed. Configured with 5.1 inches HD display, suitable for different inspection requirements. The monitor and probe can be separated by one button. It is compatible with different diameter tubes like: 2.0mm/2.2mm/2.8mm.

High temperature alarm function: Orange alarm when the temperature is above 65 °C; Red alarm and shutdown when the temperature is more than 80 °C.

Original dual battery design, 8 hours working time; real-time battery indication

The image can be outputted to HD display by HDMI.

Display resolution: 1280*960, high light, wide color gamut, all sight viewing angle, ensure clear image, rich colors and good color reproduction.

INTELLIGENT SOFTWARE

Strong intelligent image processing system: with the functions of mage rotation, white balance, exposure control, negative film and zoom in & out, comparative measurement, it can meet all kinds of complicated inspection

White Balance: Auto white balance with strong color reduction; manual-control white balance according to inspection needs.

Exposure Setting: exposure suppression--the polished object is also inspected clearly; exposure compensation--when checking large cavity, it can be more effective and clearer

Normal Mode: HD image effect
Negative Film Mode: Enhance the ability to compare and analyze the internal defects of the inspected objects.

Support 8X zoom in/out

FLEXIBLE ARTICULATION CONTROL

360° joystick-control articulation, damping type positioning design, precise probe locking technology, make the detection more accurate and efficient. Independently developed technology of long-distance transmission ensures bending angle $\geq 100^\circ$, even the tube reaches 10 meters.

360° precision articulation

PACKAGE

APPLICATION FIELD

T series videoscopes are widely used in many fields, such as automotive manufacturing, car aftermarket, police security checking, aviation and aerospace area, special inspection institute, pharmaceutical machinery, non-destructive testing, explosion-proof detection etc.

Dealer:

CT SERIES IR Videoscope

White/IR light source, one key toggle

Ultra-long viewing distance

Flexible options for tube diameter

Joystick control, 360° articulation

Dual-battery design, long working time

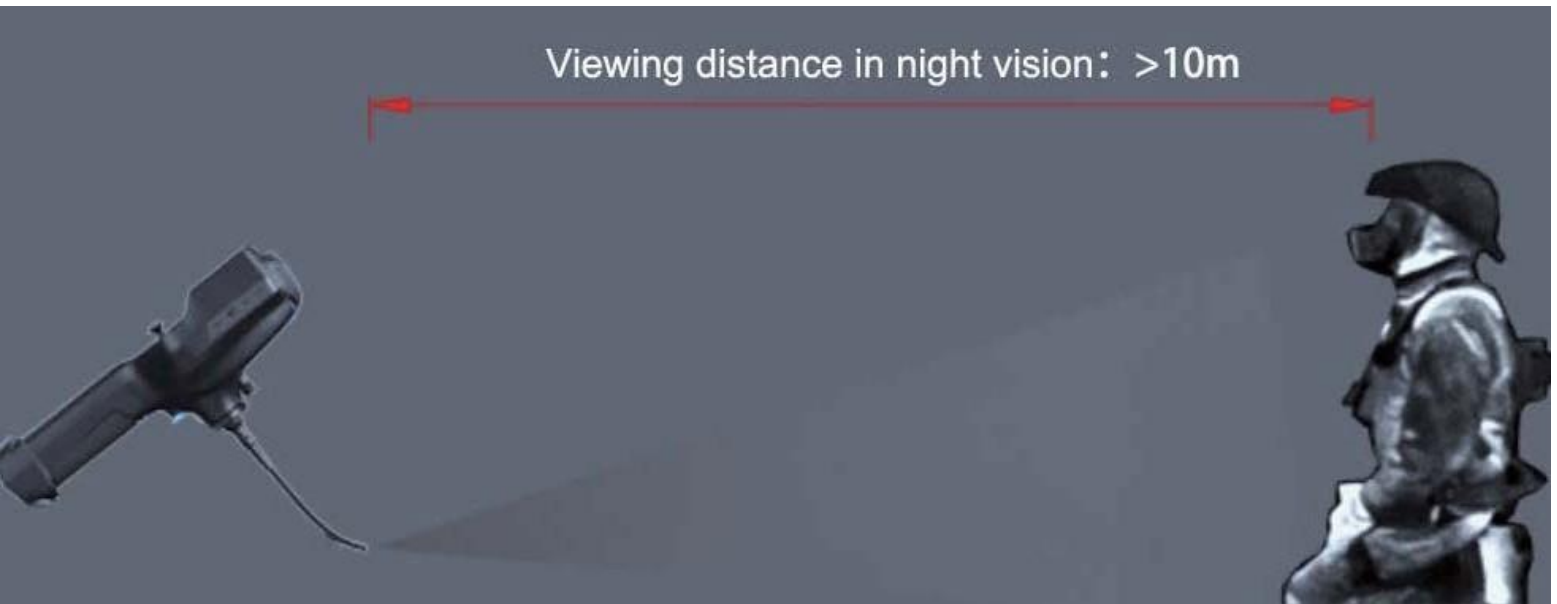

White/IR light source, one key toggle

Integrated design of IR & white dual light sources. Support one-key fast toggle.

Ultra long viewing distance

With the use of high-power rear-mounted IR light system, precision coupling technology as well as multi-mode lens group and nano coating technology, it realizes ultra-long viewing distance of more than 10 meters.

360° accurate positioning

360° all-way articulation, damping type positioning design, precise probe locking technology, makes the detection more accurate and efficient.

Maximum bending angle: 190°

Stretchable rod

It can be used for inspection on different objects, such as the bottom of a car, ceiling, etc.

Output/WiFi

Image transmission by WiFi or HDMI output, displayed with HD screen.

Working time

Original design of dual battery mode, working time is more than 8h, real-time battery indication

CT5-UV Series UV Borescope

UV borescopes Application

UV borescopes have UV (ultra-violet) LED lights and white LED lights sources for special NDT applications. Usually, UV borescopes are used to inspect internal leaks and surface flaws with fluorescent dye liquid penetrant materials. Engineers and technicians in automotive manufacturing, aviation maintenance, industrial manufacturing, energy generation and transport will find a UV borescope very useful for special inspection.

Strong intelligent image processing system: with the functions of mage rotation, white balance, exposure control, negative film and zoom in & out, comparative measurement, it can meet all kinds of complicated inspection needs.

White Balance: Auto white balance with strong color reduction; manual-control white balance according to inspection needs.

Exposure Setting: exposure suppression--the polished object is also inspected clearly; exposure compensation--when checking large cavity, it can be more effective and clearer

Normal Mode: HD image effect

Negative Film Mode: Enhance the ability to compare and analyze the internal defects of the inspected objects.

Support 8X zoom in/out

FLEXIBLE ARTICULATION CONTROL

360° joystick-control articulation, damping type positioning design, precise probe locking technology, make the detection more accurate and efficient. Independently developed technology of long-distance transmission ensures bending angle $\geq 100^\circ$, even the tube reaches 10 meters (only available on white LED light).

360° precision articulation

maximum bending angle $\geq 190^\circ$

STRONG HARDWARE

TU series HD UV fluorescent videoscope adopts modular design, the host and the handle can be separated with one button. The dual light source of the probe is designed in an integrated way, and an insert tube is equipped with both ultraviolet light and white light at the same time. By one-key switch through the universal button, white light can be used to find the direction, and ultraviolet fluorescence detection can be performed.

Monitor and tube can be separated by one button.

WIFI button

360° joystick control

damping control

High temperature alarm function: Orange alarm when the temperature is above 65 °C; Red alarm and shutdown when the temperature is more than 80 °C.

Original dual battery design, 8 hours working time; real-time battery indication

The image can be outputted to HD display by HDMI.

Display resolution: 1280*960, high light, wide color gamut, all sight viewing angle, ensure clear image, rich colors and good color reproduction.

QUALITY ASSURANCE

All products are complied with RoHS, CE and ISO standard and passed testing for temperature > waterproof > drop > vibration and pressure. We devote ourselves to providing high-quality professional inspection instrument to every customer.
